

Performance for today's market

Fiery Command WorkStation

The award-winning Fiery Command WorkStation®, the powerful, intuitive job management interface, lets users:

- Manage all Fiery Driven™ printers remotely from Mac or Microsoft® Windows® clients
- Achieve complex tasks with fewer clicks
- Increase efficiency and reduce errors with server-based automated workflows that are easy to set up and use throughout a print facility

Command WorkStation keeps getting better. EFI updates it on a regular basis. Get the latest functionality for free at efi.com/cws

RIP and hold time: 576-page, 3.5 GB PDF file

Exclusive HyperRIP processing technology

Fiery HyperRIP is a unique parallel processing technology that enables blazing-fast RIP speeds. Two HyperRIP modes (for single and multiple jobs) can increase RIP speed up to 55%, help achieve uninterrupted production and avoid lost production time.

Why speed is important

The faster speed of Fiery servers moves data to print engines faster, so they never have to cycle down. This keeps engines continuously running for higher production efficiency that increases capacity to produce more jobs and generates higher profit for your business.

VDP compatibility

Fiery servers support the most industry standards and legacy formats including:

- Fiery FreeForm™; free, entry-level VDP technology
- PPML 2.0/2.5/3.0
- PDF/VT-1 and 2
- Creo VPS™
- Xerox VIPP™ (for Xerox print engines only)

EFI's VDP solutions are also compatible with most VDP applications, including DARWIN, DesignMerge®, EFI MarketDirect, FusionPro®, GMC PrintNet, Persona™ Cross Media Suite, PlanetPress®, PrintShop Mail, Proform Designer and XMPie® uDirect® software.

Train staff to streamline production

Expand your staff's expertise on Fiery technology to take full advantage of your Fiery investment and make the most of your production capacity.

Free training resources

Stay current with the learning resources that best fit your needs:

- e-learning courses
- Express videos
- Simulated learning environments
- Step-by-step tutorials with sample files
- World of Fiery Webinars
- ABC guides
- Product guides
- Variable data sample kit
- White papers
- Case studies

EFI sells a variety of Fiery print servers with different configurations. This brochure describes many of the features that can be found in Fiery external and embedded servers. Some of these features may not be available for a particular combination of Fiery server and print engine. To verify the availability of specific features and functions, contact your Fiery vendor.

EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalized documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity. Visit www.efi.com or call 650-357-3500 for more information.

Fuel your print production success with Fiery.

Powerful digital front ends drive increased profitability

More than just a RIP, Fiery® servers offer both standard and optional tools to maximize your print engine investment.

Fiery DFEs provide constant innovations in color and imaging, productivity, management and connection — so you can produce high-quality, accurate output; quickly and efficiently.

Produce, adapt and grow

The Fiery Workflow Suite products expand the power of Fiery servers, providing solutions for every stage in the print production process. The modular products broaden the server functionality for more advanced color management, automation and job preparation.

You can choose what you need now, and add more over time to adapt to changing market demands or to grow your business.

Amazing, precise, consistent color. High-quality images.

Print perfect PDFs

Supports and guarantees full compliance with PDF/X-4 standard to reproduce transparent page elements, overprints and multiple color spaces preserving the designer's intent.

Improve image quality

Smooth low-resolution images and gradation transitions in line art. Preserve fine detail in text and vector elements to improve edge quality.

Enhance individual images in a job, without opening and editing the file in the native application.

Sharpen images and enhance colors for better-looking output.

Ensure correct output with prepress tools

Visually check and adjust the final raster output before printing to save time and reduce waste.

Preflight fonts, spot colors, low-resolution images, hairlines below threshold, overprints and PostScript® errors.

Quickly and easily identify potential printing issues such as mixed-source colors and missing spot colors with job diagnostic reports.

Profile for accurate color

Create an ICC profile that defines the gamut of your print system to ensure the best possible output.

Match color across multiple presses and on different stocks.

Create a color workflow that precisely matches industry color references.

Reproduce brand colors

Deliver the most accurate spot color output with ease.

Edit spot colors to match customer's preference.

Create and share custom spot color libraries including the latest PANTONE® approved libraries.

Real-time previews

Fast and flexible previews make your operators more productive. Use the Raster Preview feature to add, delete and re-order pages, or even merge pages from another job, immediately before printing.

Speed makeready, reduce waste

Operators can use scalable, easy-to-use makeready functions on a client workstation or on the Fiery server with Fiery Command WorkStation. For more complex makeready tasks, Fiery Workflow Suite offers additional tools: Fiery Impose, Fiery Compose and Fiery JobMaster, all with the same user interface, so operators can easily:

- Preview all jobs exactly as they will print
- Merge or move pages with drag-and-drop simplicity
- Handle last-minute edits with Adobe Acrobat® Pro and Enfocus PitStop Edit

Produce advanced, high-value documents

Advanced PDF-based makeready functions let you tackle higher-value jobs such as catalogs, manuals, proposals, reports and books with a high degree of efficiency and accuracy. Reduce waste and save time with interactive and visual job previews that:

- Cut waste with visual tab preview
- Simplify and speed creation of standard, bleed-edge and multibank tabs
- Easily integrate and clean up scanned hard-copy pages

The power of personalization

Fiery servers deliver fast, flexible variable data printing (VDP) capabilities. Proprietary rendering technology prints opaque, overprinted and transparent objects correctly, giving designers confidence that complex graphical elements will print as intended. As the only server to support PPML 3.0, the Fiery DFE enables the use of transparency even across variable and reusable content. Fiery features such as VDP Record Range Printing and intuitive visual previews make it easy to print VDP jobs correctly and efficiently.
